

POWER WASHERS (1300 PSI) – Lithium Battery – ION-1300

Power Pressure Washer 1300 PSI Lithium Battery | Brushless Technology | The Next Generation of Pressure Washer | 4X More Lifespan | Ultra Low Sound | New Design | Power Efficient | Eco Friendly

2018 NEW HIGH-TECH INDUCTION MOTOR:

Guaranteed the best product in the market, made with the best latest technology and design. You will acquire an induction motor power washer up to 1300 PSI for the same price of the old brushed motor pressure washer. That is true! A much better product for the same amount of money. **GUARANTEED!** Besides, the 1300 PSI Power Pressure Washer comes in a completely new design never seen before. Beautiful, Powerful, Portable, Super Lightweight: Perfect for the job!

POWER EFFICIENCY & 4 TIMES MORE LIFESPAN:

The 1300 PSI lithium battery pressure washer works for about 35 minutes after fully charged. Total charging time is about 2 hours. Induction motors generate less heat and require less current to generate higher power than universal (brushed) motors. This is another reason why our Power Pressure Washer is by far the best product in the market. In addition, the induction technology gives the product 3 times more lifespan! And you will NOT pay more for that!

IMPORTANT FEATURES:

The next generation 1300 PSI of pressure washers come in an unbelievable lightweight of 24 lbs. It comes with a 30ft long power cord, 20ft long hose and includes a soap dispenser (not built in, tough). It is equipped with a micro switch sensitive to water flow. This Total Stop System (TSS) senses water flow in the pump. When the trigger is released, water stops flowing through the pump. The TSS then automatically turns the motor off to protect the pump from overheating.

VERY LOW SOUND LEVEL:

Universal motors run at very high speeds and are loud. An induction motor pressure washer twice as powerful as a universal powered machine will still be quieter. You want to use your power washer any time without having problems with your neighbors, right? Another very good reason for you to buy the new 2018 Power Pressure Washer 1300 PSI Electric - The Next Generation of Pressure Washer.

YOU'LL BE A PART OF OUR FAMILY!

We're not just any old company, we are a family. Providing the absolute best customer service is the cornerstone of our business and we promise to treat you like you are part of our family.
